### Manager Comment

Global markets finally managed to find some relief in March. On a country level, major US indices recorded good gains for the month, while European and Chinese equity markets struggled. South African equity markets once again managed to advance slightly. Despite global equity markets rallying in the final week of March on the back of progress in peace talks between Russia and Ukraine, the optimism quickly faded after the Ukraine president stated he did not expect a quick resolution to the conflict. The ongoing war in Ukraine has further impacted global supply chains, record inflation levels and the prospect of tightening monetary policy.

Despite the ongoing conflict in Ukraine, developed equity markets ended the month higher as the MSCI World Index returned 2.52% m/m in USD and -3.05% in ZAR. US stocks proved resilient through the recent market volatility as the S&P 500 (US\$) posted positive m/m gains (3.71%). However, following seven straight quarters of gains they ended the first quarter of 2022 down. European equities fared worst amongst developed market peers, as their reliance on Russian energy exports exposes them most directly to the fallout from the conflict. The Euro Stoxx 50 (€) returned -0.42% m/m.

Emerging equity markets experienced another tough month, under pressure from Russia and China's performance. The MSCI Emerging Market Index closed -2.52% m/m in USD and -7.82% in ZAR. The MSCI Russia Index was marked down to zero and trading stocks were suspended. Sentiment turned considerably negative on Chinese companies in March, due to the uncertainty of whether the Chinese government would support Russia's invasion. The prospects of sanctions being extended to China left foreign investors in Chinese companies scrambling to avoid a similar outcome experienced by Russia's foreign investors.

The South African equity market advanced for the sixth consecutive month, as the FTSE/JSE All Share Index closed at 0.01% m/m. The local bourse, along with Brazil and India, were the only major global markets to deliver a positive return for the quarter. JSE-listed shares exposed to the domestic economy were the key drivers of March's performance, particularly financial companies and clothing retailers.

Financials led the pack and was the only major sector to post gains, returning 0.21% m/m. Resources finished the month in the "red" for the first time this year, -2.03% m/m. Industrials lagged once again, closing the month 4.87% down, noticeably Naspers (around -14% m/m) and Prosus (around -15% m/m) weighing on the sector. Bonds gained slightly, the All Bond Index (ALBI) returning 0.45% m/m. SA listed property experienced strong gains, 5.05% m/m. Cash (STeFI) delivered a moderate return of 0.36% m/m. South African value managers (1.44% m/m) outperformed growth managers (-1.66% m/m). Value managers have also been leading the way globally, but to a lesser magnitude.

The ZAR continues to benefit from the surge in commodity prices and the recent hawkish tone by the SARB, which in turn makes South African assets more attractive globally. The ZAR gained as much as 7.76%, 6.75%, 5.75% and 5.38% against the sterling, euro, USD, and Japanese yen.

### Investment Committee

The investment committee forms an integral part of the investment management process. The investment committee members are involved in the process of multi management by participating in the Investment Committee Framework (the "Framework"). This Framework provides intermediaries with a platform to share their research and views with qualified investment professionals who will, based on certain constraints, construct a portfolio taking the intermediary's research into account.
