### Manager Comment

2023 was a year of market surprises, indicating that volatility will always be part of the investment journey and amid the highs and lows, there will always be gains and losses for investors, businesses, and economies. Some of the market conditions might continue into 2024 but the reality is that no one knows what's in store for the new year. Economists can make predictions of how they perceive the market to play out, however, unforeseen circumstances might arise to impact global economies and once again prove market predictors otherwise.

The year ended on a high note for global investors with the MSCI World Index ending the month at 4.91% and a year-to-date (YTD) positive of 23.79%, both in dollar terms. Since late October, investors became increasingly optimistic about the prospect of US rate cuts in 2024 and this led to a benchmark rise of 16%. Earlier in the year, tech stocks showed dominance with the Magnificent Seven recording an aggregate of 50% by late October, while the rest of the S&P 500 shares were down 2% in aggregate over the same period. The S&P 500 Index ended the month at 4.53% with a YTD figure of 26.26%. Even though emerging markets were held back by Chinese stocks, the MSCI Emerging Markets Index still ended in positive territory at 3.95% m/m and 10.27% YTD. The Dow Jones ended the month at 4.93% in dollar terms, the FTSE at 4.52% m/m in pound terms, the Euro Stoxx at 3.22% m/m in euro terms, and the Nikkei Index at 0.04% m/m in yen terms.

The SA stock market ended the year positively with the FTSE/JSE All Share Index at 2% and a YTD figure of 9.25%. SA Value stocks ended at 2.81% m/m and 2.79% YTD, while SA Growth stocks ended at 1.18% m/m and 14.45% YTD. In the derivatives market, Resources ended the month negatively at -1.31%, with Industrials and Financials positively at 0.49% and 2.31% respectively. Cash ended in positive territory with the STeFI Composite Index at 0.70% m/m and 8.06% YTD, both in rand terms. In the credit market, the All Bond Index ended at a positive 1.49% m/m in rand terms, with bonds of 1-3 years at 1.10% m/m, bonds of 3-7 years at 1.25% m/m, bonds of 7-12 years at 2.23% m/m and bonds of over 12 years at 1.13% m/m. In the currency market, the rand ended positively against the US dollar at 3.62% m/m (-6.96% YTD), positively against the euro at 2.35% m/m (-10.11% YTD), positively against the British pound at 2.90% m/m (-12.21% YTD), but negatively against the Japanese yen at -4.64% m/m (+6.85% YTD).

### Investment Committee

The investment committee forms an integral part of the investment management process. The investment committee members are involved in the process of multi management by participating in the Investment Committee Framework (the "Framework"). This Framework provides intermediaries with a platform to share their research and views with qualified investment professionals who will, based on certain constraints, construct a portfolio taking the intermediary's research into account.
